**Subject:** [Ext] MCQMC 2022: Proceedings  
**Date:** August 1, 2022 at 8:02 AM  
**To:** mcqmc2022@ricam.oeaw.ac.at

Dear colleagues and friends,

We would like to thank you again for participating in MCQMC 2022, and give you further information on the proceedings of the conference.

-----

The proceedings of MCQMC will be published by Springer Verlag, and edited by the conference organizers. All papers will be refereed.

All speakers are invited to submit a paper related to their talks. The page limit for plenary and tutorial speakers is 30 pages, the page limit for all others is 16 pages. We kindly ask you not to exceed these limits.

The deadline for submission is December 31, 2022.

For initial submission, please send your manuscript as a pdf file to mcqmc2022@ricam.oeaw.ac.at . Please title your manuscript as "XYZ.pdf", where XYZ is the surname of the first author.

-----

To facilitate putting the book together, we ask you to follow some guidelines:

- Please refrain from using your own macros, but include the attached file "common-macros.tex" in your latex-file. Please do not change this file or make additions - eventually, we will use the file in its original state to assemble the book from its single chapters. This file has been used for the proceedings of several other conferences and contains a huge selection of useful macros.
- When you define labels (for theorems, definitions, equations, etc., but also bibitems), please use a prefix corresponding to the surnames of the authors of your paper: E.g., if the paper is single-authored by Minnie Mouse, all labels should have the prefix "Mo". If the authors of a paper are Donald Duck and Bart Simpson, all labels should have the prefix "DuSi", and accordingly for more authors. This will help us a lot in avoiding clashes between the labels used in different papers.
- Please do not use bib-files but include your references in your latex-file using the bibliography-environment. Also use the label policy for bibitems.

-----

Here are some guidelines that have been provided to us by Springer:

- The final version of the manuscript should be prepared with Springer's style files < <https://www.springer.com/gp/authors-editors/book-authors-editors/your-publication-journey/manuscript-preparation#c3324> > (Layout & templates - LaTeX template - contributed books (and then use the files for authors)). Regarding the references, Please follow the attached document entitled "Mathematical and Physical Sciences.pdf".
- On that springer.com page you will also find a list of Key Style Points on manuscript structure, figure resolution, reference style etc., which - if considered during manuscript preparation - will help facilitate and speed up the publication process for your book. For more detailed information, please visit the Book Manuscript Guidelines.
- Please number subheadings subsequently, starting with "1" also if the first subheading is "1

- Please number subheadings subsequently, starting with 1, also if the first subheading is "Introduction". Regarding the numbering of figures, tables, equations, theorems etc. please use the same style as shown in the authsamp.pdf.

- If excerpts from copyrighted works (including websites) such as illustrations, tables, animations, or text quotations are included in your manuscript, please obtain permission from the copyright holder (usually the original publisher) for both the print and online format. You can get to most publications via the Copyright Clearance Center at RightsLink (<http://www.copyright.com/>). Only in cases where a publication can't be found via that service, use the attached Permission Request Form and send it to the rights owner to obtain permission.

-----  
We are looking forward to many interesting papers.

With best regards,  
Aicke Hinrichs, Peter Kritzer, and Friedrich Pillichshammer
